*Thank you for choosing one of our products.
You are advised to read this manual carefully; it contains all the information you need about the right conditions for the proper, safe use of your dishwasher.*

*This manual contains only the basic information required to use the appliance. The complete manual can be obtained from **www.smeg.com/download-manuals** by entering the product code shown on the plate attached to the inner right hand edge of the dishwasher door.*

The manual can be accessed quickly via the QR code using a device with a QR reader application.

TRANSLATION OF THE ORIGINAL INSTRUCTIONS

1 General safety instructions

- This manual is an integral part of the appliance; it must always be kept intact together with the dishwasher for future reference (even if sold). Before using the appliance, carefully read all the instructions contained in this manual.
- This appliance is intended for indoor use in a household environment and similar such as staff kitchens of shops, offices and other workplaces, institutions, and for the use by guests at hotels, hostels, bed and breakfast and other residential facilities. The appliance is designed and manufactured to perform the following function: **washing and drying of dishes**; any other use shall be considered improper. **The manufacturer declines all responsibility for uses other than those described above.**
- Do not use appliances which have been damaged during transit! If in doubt, contact your dealer.
- The appliance must be installed and connected in accordance with the instructions provided by the manufacturer. **Installation must be performed by qualified technicians in accordance with applicable regulations.**

-
- Never leave waste packaging unattended. Do not allow children to play with packaging materials. Separate waste packaging materials by type and consign them to the nearest recycling centre.
 - The plate with the technical data, serial number and marking is in a visible position on the inside edge of the door. **It must not be removed.**
 - The appliance must be earthed in compliance with electrical safety regulations. **The manufacturer declines all responsibility for damage to persons or property resulting from failure to earth the appliance or from a defective earth connection.**
 - During the installation the appliance must be disconnected from the network.
 - Do not install the appliance in a place subject to freezing.
 - Do not install the appliance near equipment with high irradiation temperature (e.g. gas burners, fireplaces, etc.).
 - If the appliance is installed in a compartment above or below another equipment (e.g. gas burners, ovens, etc.), read carefully the instructions provided by the manufacturer of the equipment. If the instructions of the equipment do not contain information, contact the manufacturer of the equipment to ensure that the appliance can be installed above or below it.

-
- Building-in the appliance underneath a hob is absolutely forbidden. Installing a hob on top of free-standing appliance is absolutely forbidden.
 - To ensure stability, install the appliance only under continuous worktop, securely fixed to adjacent cabinets. If the appliance is installed in a high cabinet, both the appliance and the cabinet must be adequately fixed.
 - If the appliance is not built-in and is therefore accessible on one side, the door hinge area must be covered for safety reason (injury hazard). The covering fixtures are available as an accessory from specialist dealers or the after-sales.
 - Check that the voltage and the frequency of the mains match the ratings on the name plate of the appliance.
 - The plug on the supply cord and the corresponding socket outlet must be of the same type and meet the regulations in force. Do not use adaptors or shunt connections in order to avoid the possibility of overheating or burning.
 - The plug of the appliance must be accessible after installation. Never disconnect the plug by pulling on the power supply lead.
 - If the appliance is provided with a plugless supply cord, an omnipolar circuit breaker providing a full disconnection in overvoltage protection class III must be installed in an easily accessible position on the supply line.

-
- The appliance **must** be connected to the water supply by means of new hoses.
 - Briefly test the appliance after installation. Run a wash cycle with a temperature of between 45 and 70°C with the dishwasher empty and using a specific dishwasher detergent. (It is not sufficient to run a soak cycle). If the dishwasher fails to operate correctly, disconnect it from the electrical power supply and call the nearest technical service centre. **Never attempt to repair the appliance yourself.**
 - The dishwasher should only be used by adults. Use by children aged from eight years and persons with reduced physical, sensor or mental capabilities or lack of experience and knowledge is only permitted under the supervision of a person responsible for their safety.
 - I Do not allow children to play with the appliance.
 - Keep children away from the dishwasher when the door is open. Always check that the detergent distributor is empty after completion of the wash cycle.
 - Cleaning and regular maintenance of the appliance by children is only permitted under the supervision of a person responsible for their safety.
 - Some detergents are strongly alkaline. Avoid contact with the skin and eyes. Detergents can be extremely dangerous if swallowed. They contain substances capable of causing permanent damage to the mouth and throat, and even leading to

suffocation. Observe all the safety instructions on the packaging of these products.

- Do not drink the water residues which may be present on the dishes or appliance at the end of the washing program.
- Never place solvents such as alcohol or turpentine, which are potentially explosive, inside the appliance. Never load dishes soiled with ash, wax or paint.
- Never leave the dishwasher door open; people might trip over it. Leaning or sitting on the dishwasher door when open may cause the appliance to overturn and/or damage it.
- Switch off the dishwasher after use to avoid wasting electricity.
- Knives and other kitchen equipment with sharp edges must be placed in the basket with their tips downwards, or horizontally in the top basket; take care not to injure yourself on any sharp edges protruding from the baskets.
- The appliance satisfies all applicable safety regulations governing electrical equipment. Any technical checks should be conducted exclusively by trained and authorised technicians: **repairs performed by unauthorised persons not only void the warranty but may also put the user's safety at risk.**
- In the event of a fault, disconnect the dishwasher from the electrical power supply and shut off the water tap. In the event of damage to the supply cord,

have it replaced by the manufacturer or an authorised technical service centre.

- Some components are live even with the **on/off** button in the off position. Before performing any maintenance work on the appliance, disconnect it from the electrical power supply.
- Do not clean the machine with a water jet machine, high-pressure or steam cleaners.

- **Models with “acquastop” device**

This device prevents flooding in case of water leak. When the “acquastop” device is tripped, contact a qualified technician to identify and repair the fault.

In these models the water intake hose contains a solenoid valve. **Do not cut the hose and do not allow the solenoid valve to drop into water.** In case of damage to the water intake hose, disconnect the appliance from the electrical and water supply.

Warning: The device only works if the dishwasher is connected to the mains.

1.1 Declaration of conformity

The appliance complies with the essential requirements of the following European directives:

- 2009/125/EC
- 2011/65/EU
- 2014/35/EU
- IEC/EN 62471, risk group 1, for models with internal lighting.
- IEC/EN 61770

1.2 Disposal

This appliance must be disposed of separately from other waste (directives 2012/19/EC).

The appliance does not contain substances in quantities sufficient to be considered hazardous to health and the environment, in accordance with current European directives:

To dispose of the appliance:

- Cut the power cable,
- make the lock unusable.

The manufacturer declines any liability for damage or injury caused by failure to comply with the instructions indicated above or as a result of tampering with even just one part of the appliance and the use of non-original spare parts.

2. Installation

2.1 Technical characteristics

Water supply pressure	min. 0,05 - max. 0,9 MPa (min. 0.5 – max. 9 bar)
Water supply temperature	max. 60°C
Capacity	14 standard place settings
Class of protection against moisture	IPX0
Protection against electric shock	class I
Electrical data	see the data plate

Appliance dimensions (mm)

2.2 General Information

- This appliance may be placed up against walls or other furniture units.
- If the appliance is installed near a heat source, fit a special insulating panel to prevent overheating and malfunction of the appliance.
- To facilitate the installation procedure, the intake and drain hoses can be positioned in any direction; make sure that the hoses are not kinked, crushed or pulled too tightly.
- A hole at least 8 cm in diameter is required to allow the power supply cable and hoses to pass.
- At the end of the installation, perform a short test of the appliance: open the water tap and check that there are no leaks.
- To install the dishwasher against the back wall, the hoses should be passed through the lower area where there is a dedicated space for them.

Level the appliance on the floor using the appropriate Allen key to regulate the adjustable feet. This operation is essential for ensuring correct operation of the dishwasher.

Some models are equipped with only one adjustable foot at the rear, which can be adjusted by turning the screw on the lower front part of the appliance.

Building-in a dishwasher underneath a hob is **absolutely forbidden**.

Moreover, dishwashers **may not** be installed directly touching appliances which are **not conventional** built-in kitchen appliances (e.g. fireplaces, stoves, etc.).

When installing the dishwasher in a compartment next to one or more other appliances, it is essential to comply with all the recommendations provided by the appliance's manufacturer (minimum distances, installation procedures, etc.).

For free-standing models only

- Installing a hob on top of a free-standing dishwasher is **absolutely forbidden**.

- If the appliance is accessible from one side, the door hinge area has to be covered for safety reasons (risk of injury). The covers are available as an accessory and can be ordered through the Technical Assistance Service.

- The top surface of the dishwashers can be removed to allow installation under a worktop.

The **appropriate kit** should be purchased from authorised dealers or via the Technical Assistance Service.

This must be carried out by authorised personnel.

2.3 Water supply connection

CONNECTING TO THE WATER SUPPLY

Connect the intake hose to a cold water supply with $\frac{3}{4}$ " gas thread, inserting the filter **A** supplied with the dishwasher. **Take care to screw the hose firmly into place with your hands and then complete by tightening about $\frac{1}{4}$ of a turn with pliers.**

In dishwashers equipped with the AQUASTOP device, the filters is already fitted inside the threaded ring.

The dishwasher can also be connected to a hot water supply **not exceeding 60°C**. Supplying the appliance with hot water cuts down the washing time by approximately 20 minutes, but slightly reduces its effectiveness. Make the connection to the domestic hot water supply using the same procedure described for connecting to the cold water supply.

Supplementary note regarding the water connection, for the German market:

Before connecting the product to the water supply, make sure that the water system has been fitted with a safety device to protect drinking water against contamination due to backflow (according to DIN EN 1717). The water valves and/or taps are fitted with these safety devices if the water system of the house has been properly implemented.

DRAIN CONNECTION

Insert the dishwasher's drain hose into a drain pipe having a diameter of at least **4 cm**, or alternatively, place it inside the kitchen sink using the plastic support provided, taking care not to crush or excessively bend the hose. It is important to prevent the hose from coming loose and falling. For this purpose, the plastic support is equipped with a hole for tying it to the wall or water tap.

The free end should be positioned at a height of between **30 and 100 cm**, and should never be submerged in water.

If a horizontal drain extension hose is used (for a maximum 3 m), the drain hose can be placed at a maximum height of **85 cm** from the ground.

2.4 Electrical connection

Check that the voltage and the frequency of the mains match the ratings on the name plate of the appliance positioned on the inner edge of the door.

- The plug on the supply cord and the corresponding socket outlet must be of the same type and meet the regulations in force.
- The plug must be accessible after installation.
- **Never disconnect the plug by pulling on the power supply lead.**
- After changing the supply cord, make sure that the bracket which secures the cord is fixed securely in place.
- **Do not use adaptors or shunt connections** in order to avoid the possibility of overheating or burning.

The power cable must be replaced by the manufacturer or by an Authorized Service Centre.

3. Product description

3.1 Control panel

All the dishwasher controls are grouped on the front panel. Programming and option selection are only possible with the **door closed**.

1	ON/OFF BUTTON AND WARNING LIGHT
2	OPTION SELECTION BUTTONS AND WARNING LIGHTS
3	“CHILD LOCK” ACTIVATION BUTTONS
4	START/PAUSE BUTTON
5	PROGRAM SELECTION BUTTONS
6	INFORMATION DISPLAY
7	HANDLE TO OPEN THE DOOR

N.B.: symbols and styling are guideline and may vary depending on the model or version of the dishwasher purchased.

The dishwasher is equipped with a practical **DISPLAY** which provides information on the programmed dishwasher functions.

	Rinse aid lack warning indicator
	Salt lack warning indicator
	End of cycle signal
	“Child lock” option warning light
000	Delayed start indicator, wash cycle duration and alarms
   	Program phases warning lights.

LIGHTING

Pressing the **ON/OFF** button will start the dishwasher and will lit up the dishwasher pilot light. After approximately **3 second** from this operation the **DISPLAY** will be turned on with a visualization that will depend upon the state of the dishwasher.

PROGRAMMING

All the programming operations are possible only with closed door. With open door, on the **DISPLAY** will appear - - : - -.

SELECTION PROGRAM

The program selection is possible through the relative buttons.

By pressing the relative button of the desired program (see table) it will light up the relative pilot light to confirm that the operation occurred and on the **DISPLAY** a program duration forecast will appear (“**h.mm**”).

START PROGRAM

At this point, in order to start the machine, it is only enough to press the **START/PAUSE**  for some seconds until the symbol **START/PAUSE** start to flash and confirmation “beep” is heard. From this moment the cycle duration on the **DISPLAY** starts to decrease.

Program progress is indicated by the program phases that show the status of the current cycle.

The current phase flashes, while the next washing phases lights stay on. At the end of each phase, the signal will turn off.

N.B.: when a program which does not need the prewash phase is selected, the prewash signal stays off.

Prewash

Wash

Rinse

Drying

Warning:

during the initial phase of the wash program the spray arms cannot be heard in operation because they start turning about 5 minutes after the start. This is the normal wash cycle sequence.

END PROGRAM

At the end of the program the **DISPLAY** shows "**end**". By pressing one of the program buttons the dishwasher is ready to start a new cycle.

INTERRUPTING A PROGRAM

In order to interrupt a running program it is necessary:

- to press the **START/PAUSE**  for some seconds until when the led **START/PAUSE** remains lit on (confirmation beep). At this point, it is possible to start the cycle again, otherwise:
-

TO CHANGE A PROGRAM

To change the running program it is necessary:

- to interrupt the running program (see "**INTERRUPTING A PROGRAM**");
- select the new program;
- to press again the **START/PAUSE** button  to make start the new program.

STOPPING A PROGRAM

To cancel a program which is running:

- Interrupt the program (see "**INTERRUPTING A PROGRAM**")
- Press the **START/PAUSE** button  and hold it down; the display will show "**P0**" and the dishwasher will immediately switch to the end of the cycle and drain the tank (during this process, the "**START/PAUSE** led will flash). When the drain procedure ends, the end of cycle "**End**" message appears on the display.

*In case that the door is opened during the operation, to the next door closing it is going to be necessary to start the program as shown in paragraph "**STARTING THE PROGRAM**". The program will resume from the point in which it was interrupted.*

In case that the tub temperature is higher than 50°C the program will start about 60 seconds later.

PROGRAMS TABLE									
Program		Pre-wash	Wash	Rinse °C		Drying	(1) Duration (min)	Water consumption (liters/cycle)	(1) Energy consumption (KWh/cycle)

Automatic door opening – Dry Assist

Automatic door opening is **included** in programs indicated with ** in the first column

(*) Standard program according to **EN60436**. The DRY ASSIST option (if the  button is present) must be active.

(1) Consumption and program duration are measured according to EN 60436. The values may vary due to various factors, such as the inlet water temperature and the number of dishes.

(2) With the dry assist option  selected (default) / not selected.

Automatic door opening-Dry Assist

It activates automatically when a program that includes the function it is selected (the light comes on).

It can be deactivated by pressing the button (the light turns off).

The program ends with a drying cycle that consists of a time during which the door is closed, and a time during which the door is slightly open (just waiting, to assist drying).

The duration depends on the program and model.

Any intervention (opening / closing the door, switching off etc.) during this stage will end the program early.

The program can be interrupted during the drying cycle and the dishwasher can be unloaded before the cycle has completely ended, which is indicated by a visual and/or audible alarm (depending on the model), but best drying results may not be obtained.

The complete program ends only when indicated by a visual and/or audible signal (depending on the model).

There must be sufficient space available for the door to open. The door must not be forced open and closed before the wash cycle has ended completely.

Notice for testing institutes

Testing institutes are provided with guidelines for comparative tests (e.g. according to EN60436). request the guidelines by contacting us at the following e-mail address: dishwasher@test-domestic-appliances.com

When making a request, please specify the model (MOD) and the serial number (S/N) indicated on the plate on the side of the door.

Description of the programs:

SOAK

Rinses dishes while waiting to be washed.

DELICATE

Mixed loads such as wine glasses and lightly soiled dishes.

ECO

Cycle with the lowest water and energy consumption, recommended for normally soiled dishes, even with dried-on residues.

MIX 65°

Normally soiled mixed loads such as dishes and pans, even with dried-on residues.

INTENSE 70°

Heavily soiled plates, pots and pans, even with dried-on residues.

EXPRESS 27'

Quick cycle for lightly soiled dishes, washed immediately after use.

CRYSTAL 45°

Wine glasses and lightly soiled fine china. Ideal when you require dazzlingly clean glassware.

GREEN EXPRESS

Quick wash cycle with low water and energy consumption. Suitable for normally soiled mixed loads, washed immediately after use.

FULL EXPRESS 60'

Quick cycle for normally soiled mixed loads such as dishes and pans, even with dried-on residues. Dishes are washed and dried in 60 minutes.

HYGIENE 99,9% 75°

Intensive wash cycle for plates, pots, pans, cutting boards, feeding bottles. Ideal for baby dishes or if there are allergy sufferers in the family.

NOTE: The Hygiene 99.9% program has been tested by an external laboratory (VDE) without an option selected.

In order to be effective, the cycle should not be interrupted.

OPTIONS TABLE

Option		Description
1	SPECIAL	 Creates additional programs.
2	DRY ASSIST	 Allows the dishes to be dried perfectly even at low rinse temperatures, with significant energy savings. It starts automatically if the selected program is compatible with it. If it is not required, press the button to disable it.
3	½ LOAD FLEXY ZONE	 Ideal if just a few dishes need to be washed, allowing energy savings and a shorter wash cycle.
4	DELAY	 Allows the wash cycles 1 or 3 to be delayed by up to 9, 12 or 24 hours depending on the models.
5	SELF CLEAN	 Dishwasher cleaning cycle. Must be started with the machine empty, without dishes.

4. Operating instructions

After having installed the dishwasher, remove the basket retainers.

4.1 Adding the salt

The salt prevents the formation of scale deposits.

- Unscrew the cap of the salt container.
- Only for the first time, fill the container with a litre of water.
- Pour salt (approx. 1 kg) into the container using the funnel provided with the dishwasher.
- Remove any salt residues before screwing the cap back on.

To regulate the water hardness setting, please refer to the complete manual that can be found on the website.

- *Only use regeneration salt specifically for domestic dishwashers.*
- *After having added the salt, run a wash cycle to remove any excess salt.*

4.2 Adding the rinse aid

The rinse aid helps to dry the dishes more quickly.

To add rinse aid:

- Open the dispenser by pressing and lifting the tab on the cover.
- Top up again when the rinse aid indicator light turns on.
- Close the cover, a click indicates when it is closed.
- Use a cloth to remove any spillage of rinse aid which might lead to the formation of excess foam.

To regulate the amount of rinse aid, please refer to the complete manual that can be found on the website.

4.3 Adding the detergent

- Open the detergent dispenser cover by lightly pressing the button **P**.
- Add the detergent or tablet.
Close the cover by sliding it until it stops, indicated by a click.

5. Cleaning and maintenance

Before carrying out any work, always unplug the appliance from the electrical supply or switch off the omnipolar circuit breaker.

CLEANING THE WATER INTAKE FILTER

Close the water supply tap, unscrew the end of the water intake hose, remove the filter **A** and clean it under running water. Put the filter **A** back into its seat and carefully screw the water intake hose back on.

CLEANING THE SPRAY ARMS

Remove the spray arms and wash them with a jet of water. Put them back in their seats, **making sure that there is nothing to prevent them from rotating.**

- To remove the **upper** spray arm, unscrew locking ring **R**.
- To remove the **lower** spray arm, simply lift it up, pulling by the central part. To remove the **orbital** spray arm assembly, take hold of the longer arm and pull the orbital unit upward.
- To remove and clean the **planetarium** sprayer follow the instructions provided.

PLANETARIUM

CLEANING THE FILTER UNIT

- Remove the planetarium spray arm (only for the models on which it is fitted)
- Grip the tabs, turn them anticlockwise and lift upwards.
- Push the central filter **D** from underneath to remove it from the micro-filter.
- Separate the two parts that make up the plastic filter by pressing the body of the filter in the zone indicated by the arrows.

6. Troubleshooting

The dishwasher has an autodiagnosis system capable of detecting and indicating a preset series of possible malfunctions.

TABLE OF MALFUNCTIONS DETECTED BY THE AUTODIAGNOSIS SYSTEM

FAULT	DESCRIPTION
Error 01	Anti-flooding system tripped (where installed).
Error 02	The system that limits the water level in the dishwasher has been tripped.
Error 03	The dishwasher is unable to heat the water.
Error 04	Temperature sensor disconnected.
Error 05	The dishwasher is unable to fill with water
Error 06	The dishwasher is not able to pump out the water from the tank.
Error 07	The dishwasher is not able to measure the amount of water loaded accurately.
Error 08	Anomaly in the system which distributes water to the baskets.
Error 09	Water intake system malfunction.
Error 11	Washing pump failure

If an alarm occurs, the machine stops the current program and indicates the fault.

- Alarms **E1** and **E11** require you to contact the technical assistance service.
- Alarm **E7** is displayed at the end of the cycle, which is anyway completed, as it does not affect the operation of the dishwasher.

For all other alarms, proceed as follows: stop the current program, switch off the dishwasher. Switch on and program the dishwasher again to start the new wash cycle.

*If the malfunction persists, contact your authorised Service Centre and **provide it with the fault code.***

The contact details of the Technical Assistance Department can be found on the warranty certificate and the website

The manufacturer reserves the right to make any changes deemed necessary for the improvement of its products without prior notice.
